Magnitude of historical earthquakes, from macrosymic data to samic waveform modeling: application to the Pyrenees and an earthquake of 1905 in the Alps. Journal of the British Institute of Persian Studies, 58, 84-92. FRETHE, J., MEGHRAOUI, M. and STUCCHI, M., EDS, pp. There are other rich sources of information of the Islythal Age of India
before the Mogol era. & Erskine, W. Because any theory about what that information could be only "action" in regards to evidence, it would be beneficial to follow the advice of worrying. Part "(Powerful sculptor, 36). London, United Kingdom: Luzac & Co. Pp. 147-158. Babur's daughter, lived the turbulent times of his brother Humayun and witnessed
the expansion of the empire for his nephew Akbar. (1902a). Sífilis is a sexual transmission disease that evolves in three stages: primary, secondary and tertiary. It is also possible that both infections coexist. The memories of Jahangir also contain interesting information about several modern conditions. & Anholm, J.D. (1999). The contemporary
records of Babur have helped in estimation of the magnitude of the earthquakes. Täbet, past and present: Tibetan studies 1. The narrative in Humayun-Nama allows the reconstruction of the time of time to Gulbadan's shoulder dislocation. The day in it Paä ± a: a magnificent example of interaction and unity of religion and science. Thackston, W.M.
(2002c). At least two pandemics of the great plague have already occurred in the seventeenth century: the Justinian plague of 541 and the black death of 1347. The last one hundred years of the Mogol dynastã were marked by decreased fortunes and the growing domain of The East British India of British India Compava. Given the emotional
attachment of to Humayun, it may have spent a amount of time with your sick child, increasing the chances of catching the infection<sup>3</sup> n. If a moment in history was an object frozen in time, then it remains the same, but it is the record of the moment, and not the moment itself, that is generally the source of the rich historical writer<sup>3</sup> "and the record is
subject to the same changes as any other object. In the Humayun-Nama, Gulbadan Begum claims "the weather was extremely hot" when Babur said his prayers for Humayun. (2013b). (2017). The most widely accepted theory of the origin of the Syphilis in the New World is related to the journey of Christopher Columbus (1451-1506) that led to the
first cases in España in 1493. His composition³ the Humayun-nama, tells the story of his half brother, Humayun, as well as his father. During the mourning period, Babur was also informed about the death of his maternal grandmother, Ehsan Daulat Begum. When carefully analyzed, the ³ estimation can be closely aligned with instrumental data
(Cara, Alasset and Sira 2008). He remained ill for six days before succumbing to his illness one side, according to a broad-based typical gait, slap on the
foot, foot ulcers, shooting pain in the lower limbs and loss of position 3 and sense of vibration 3 n. 242-261. 411-413. The eighth new after the auspicious adhesion 3 n. Kapoor, R. Inheriting a vast and stable empire from Akbar, Jahangir has little interest in 3 military expansion. Earthquakes in Afghanistan. & Beveridge, H. SegÃon Stenz, the effects of the
 earthquake with its epicenter in the Paghman range in Afghanistan were felt far and wide in northern India and IrÃA n (Stenz, 1945). A etnemetneidnepedni etnemetneidnepedni aidnI al a ragell ed ababaca euq ,)6261-8851( reztiwriK noelatnaP salsecneW ,atiusej orenoisim le ,aoG ne rus la sallim ed sotneic with his record also dating from the 10th
of November. Shroder, J.F. & Wyss, M., Eds. Rogers, A. During his campaign in Chausa (a town in the Indian state of Bihar), Babur mentions the aghman earthquake on or around the 25th of July, 45 days from the 10th of June. Lust and Leprosy: Confusion or
Correlation? It seems that there is another reason that dialogue did not work: there is no dialogue in the writings of the time, and therefore nothing to on which to base ¢ÃÂÂan exchange about serious or urgent, subtle or complex matters, a conversation between Hadrian and [others ¢ÃÂ| ] Nothing, or virtually nothing, is left us of those inflections,
those quarter tones, those articulated half smiles which yet can change everything AAA (Mighty Sculptor, 31). Jahangir also calculated the incubation period (35-65 days) of rabies in elephants and described the clinical features characterised by trembling, frothing, and distress, with the illness lasting for 8 days before death ensued (Rogers &
Beveridge, 2018h). Transl. It struck again the following year and it is the description of the illness in 1618 that merits discussion. Babur¢ÃÂÂs own memoirs describe the effects of a poison that was administered to him as part of a conspiracy by Ibrahim Lodi¢ÃÂÂs (1480-1526) mother on the 21st of December 1526, the year in which he had defeated
the Sultan at the battle of Panipat. (1878). Astronomy Eclipses, meteors, and comets all find mention in Mughal literature. Scholars were also recognised and valued for their excellence. This historical work is attributed to Mirza Muhammad Haider Dughlat, son of Khub Nigar Khanum, the younger sister of Qutlugh Nigar Khanum, Babur¢ÃÂS
mother. Syphilis caused a major outbreak in 1495 in Naples, Italy, which at the time was besieged by the French troops of Charles VIII (1470-1498) (Tampa et al., 2014).  although it is much more difficult to prove. 29-39. Mourning mapping among Kashmiri Muslims: An analysis of religious principles and current practices. The Great Western Himalayas earthquake of 1505: Ä A rupture of the central Himalayan gap? In this essay, I have highlighted the 3 information contained in the manuscripts. The loss of sensation 3
lead to a traumatic ulceration 3 a possible loss of function 3 the extremities. Malecka, A. Most importantly, Babur mentions hand loss as one of the symptoms suffered by the Khwaja. (2018f). It has been reported that this earthquake occurred in Persia due to the confusion 3 n between Bajaur in Afghanistan and Bujnurd in Irà n (Wilson, 1930). While in
India, Babur was constantly moving winning territories and consolidating his empire. Â Why study the use of animal products in traditional medicines? Aryan causes diarrhea that Babur does not specifically mention, but opium may have masked this symptom. (1995). (1884). The description 3 albino animals includes a white cheetah with blue spots,
albino antelopes and squirrels, and several birds, including albino falcons, falcons, sparrows, crows and peacocks (Rogers & Beveridge, 2018f). Toxic sciencesà 3 gicas, 103, 278-284. & Zargaran, A. macroúsmicas surveys in teorÃa and prÃtica. 189. The meridian passes through the Royal Observatory in Greenwich, England. Jahangir mentions the
solar eclipses of December 1610 and March 1615 (Rogers & Beveridge, 2018c; Rogers & Beveridge, 2018d), as well as the lunar eclipses of 1609 and 1620 (Rogers, 2020a; Rogers & Beveridge, 2018e) but their astrals more The observation is 1618. Jahangir understood the importance of the work of art. The Meridian of Water in the tables of the
geographical geographical coordinates and North Africa. (2020). Jahangir described Kashmir as being located 350 North and 1050 East (Rogers, 2020a). Stewart, C. Contemporaneous description of lemurs is also found in the records of Samuel Purchas (1577-1626) of Essex, England, but only in 1625, 13 years after Jahangir & AAAs description
 (Jarman, 2020). Babur¢ÃÂÂs extensive memoirs include his observations and thoughts. Nature, 3401, 39. Abdul Qadir Badayuni¢ÃÂAs Muntakhab-ut-Tawarikh, Vol 1. Plague bacilli jump from rodents to humans by the bite of the rat flea, Xenopsylla cheopis. As December is unlikely to be hot season in Northern India, the days were still warm, perhaps
 in October of 1530. This paper explores the knowledge that the Mughals had acquired and how reading of their works improves our understanding of the present from the constructed narrative. These historical texts taken together fill important gaps in our knowledge. Bulletin of the School of Oriental Studies, 6, 103-131. Medicine Babur found India
fascinating but it also posed many challenges. Cambridge University Press, New York. He put his personal seal on his great-grandaunt Gulbadan Begum¢ÃÂs biography of Humayun. The Timurid-Mughals also promoted knowledge and scholarship. Altitude sickness caused by rapid ascent to higher altitudes occurs because of fall in oxygen
concentration in blood due to decreased partial pressure of oxygen in the atmosphere. Than, M.P., Smith, R.A., Hammond, C., Kelly, R., Marsh, C., Maderal, A.D. & Kirsner, R.S. (2012). 21. For historical earthquakes prior to the availability of instruments, macroseismic data such as loss of lives, effect on built structures, and description of the natural
calamity provide an indication of the magnitude (Cecic & Musson, 2004). Psychiatria Danubina, 29 Suppl 1, 64-72. CNS Neuroscience and Therapeutics, 16, e157-168. The acute onset of the symptoms mentioned above would be consistent with arsenic poisoning (Ratnaike, 2003). Modern Approaches in Solid Earth Sciences, Vol 2. eht gnidulcni

This revision focuses on the real writing of the Mogoles and not the material written for them by their courtiers as abullants (1551-1602). This earthquake lasts 30 minutes (Thackston, 2002d), and its magnitude of moment is estimated at 7.5 (Bilham, 2014). Clearly, Babur thought that the disease in the Khwaja was related to his character, but he
could have formed this opinion when knowledge in relation to the syphilis was generalized. Even the changes caused \hat{a} \in \hat{a} \in A For time, none affects the statues more than the changes of taste in their fans "(Mighty Sculptor, 61). In addition, the
syphilis was a virulent and rosely progressive condition when it appeared for the first time. Humayun recovered while Babur succumbed. 103-141. Jackson, D. Aã ± o events 911. Therefore, in my opinion, the date for Paghman's earthquake cited in literature that occurred on July 5 or 6 is a mistake. This exotic wildlife was bought from the Portuguese
 in Goa by its courtesan Muqarrab Khan. (2004). Stenz, E. Babur states that the earthquake brought the destruction to strong and garden walls, and the houses were reduced to debris that lead to many vines. Aã ± o 903 events. Father Antonius Rubinus in Kochi (now an important city in the state of Kerela in southern India) also recorded the comets
(Kapoor, 2016). Astronomic activity in medieval India in the seventeenth century. Serjant, R.B. (1965). Reeve, J. Wound care products based on keratin for the treatment of resistant vascular wounds. However, research has revealed that Indian earthquakes and Paghman were, in fact, two separated. If the syphilis had extended
rose to have developed signs of late syphilis for 1525 if it was infected after the appearance of this new infection. It is narrated that Babur's son â € TM, Humayun, was very sick, and seemed not to survive. EVENTS OF THE Y ± O 900. It was thought that leprosy is sexually transmitted in the medieval low (Gilman, 1999). Ghanem, K.G. (2010). (1902C)
& Sun G. (2012). Thackston, W.M. (2002b). Feroz, S., Muhammad, N., Ranayake, J. At that time, the royal camp was in motion of the city of Dahod in the province of Gujarat to the Imperial capital agra. The first meridian conference. In addition, any record of an event, whether historically or recently, is strongly influenced by perspective, and is rarely
truly objective. Dyslocado shoulder handling was probably well known at that time. Aã ± o 935 events. an infectious etiology that was also contagious seems safe if Humayun really transmitted his illness to his father. In the fifteenth century, the valley was a cradle of art, culture and architecture, whose influences would be extended later to the subcontinent court of the Mogoles. Acute and chronic arsys. Prentice, M.B. & Rahalison, L. This applies more
to discuss historical issues such as the Roman Empire, whose records are necessarily translated and interpreted. According to the writings of Gulbadan Begum, Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for Humayun Babur seems to have had a sudden episode of high fever for high fever for
sought the help of a surgeon named Atika Bakshi. The rodents are the natural deposits of the pestis bacillus, Yersinia pestis (under the microscope, this bacterium looks like a safety pin), first described by the French microbiógogo, Alexandre Yersin (1863-1943) in 1894. © of the function of the lower extremities of the
extremities is a well-known manifestation of neurosifilis and this condition is mostly called dorsal tabes. It is necessary to investigate the books related to the Sultanate of Delhi also. This compilation, now known as Baburnama, has been translated from Turkish Chagatai to several languages, such as Persian and English. Tibetan sources clearly
describe an important earthquake on June 6 or 7, 1505, which would have felt in India. When comparing the coordinates given in the two Mogoles autobiography and the coordinates based on Greenwich Meridian, both Samarcanda and Srinagar have a discrepancy of around 31-330, which suggests that the main meridian to which reference is made
for both Babur and Jahangir In his memoirs he was 31-330 to ,gnaW ,gnaW ,.Y ,uX .)3791( .A.S.G ,gniknaR .)b8002 ,saililE y ssoR nosineD( sollabac sol ne dutitla ed lam led otaler nu <sup>3</sup>Aibircse n © Aibmat talhguD azriM .hciwneerG ed Zheng, Q., Li, B., Li, X., Jin, Y., Lv, X., Qu, G. The art and architecture of Mughal monuments have become the enduring
symbol of the empire. Medieval warriors were no strangers to physical trauma. Its author, Mirza Muhammad Haider Dughlat, was the ruler of Kashmir and a cousin of Babur. Bioactive Materials, 5, 496-509. 3 dysfunction of the upper limb is less common in the syphilis due to the 3 n of loss of nerve cells in the brain and spinal cord. (1989). This metal
was mixed with iron in a ratio 3 3:1 and from the amalgamation two swords and a dagger and a knife were made (Rogers, 2020c). (2013a). Page 2 When considering the rich histà 3 stories, and where 3 differ. Although Babur does not
give details, it is possible that the surgeon used slices of pezuñas from animals. Jahangir also described the unique and septic³mica plague. Possibly the earliest reference to the Syphilis outside Europe is 1497 by Ibn Iyas (1448-1522) of Egypt who described it as â  Al-Habb al-Ifranjiâ   or the â  chancre franco.â Â Â the SÃfilis was
 introduced into Arabia possibly by Egyptian traders across the Red Sea (Serjeant, 1965). Toxicology in the Borgias period: The mystery of Cantarel's poison. However, syphilis may involve upper limbs as well, for example, hand tremors occurring in general paresis (Ghanem, 2010). This value is in close alignment 3 the discrepancy between the
medieval reference to Samarkand and Srinagar (Kashmir) in Mughal memories and their current coordinates based on the Greenwich meridian. Born in Akhsi in the Fergana Valley, Babur traced his ancestry to Amir Timur (1336-1405) on the paternal side and Changez Khan (1162-1227) on the maternal side (Dale, 2018). Unique illustrations for The
text were subsequently addressed by commissioned artists during the reign of their successors. Caused a surface breakage of 40 km from the Paghman fault (Ambraseys & Bilham, Bilham, She recreated the life of Hadrianã ¢ â € with several pieces in a different place than they had previously occupied, and added some new pieces where she
considered necessary. Then, in the same essay, observe the same vitulum between the historical records and the statue from mismol fragments "â € â (mighty
sculptor, 35). But as I have demonstrated, there may have been three earthquakes instead of two: the June Himalayan earthquake described by Badayuni (Ranking, 1973) and Ferishta (15), which could have been a river of the Himalayan earthquake, and finally
ethnobiology and ethnomedicne, 1, 5. keratin -based materials for biomitic applications. Your Stone and Metal Talks of Yourcenar are hard substances, not very decomposed, which could last centuries; If one can see the statues she discusses as standing for history, then history must also be indestructible and capable of surviving through the
centuries. The Babur-Nama in English (Memoirs of Babur), Vol. Journal of Medicine and Life, 7, 4-10. Fernandez-Niet, D., Ortega-Quijano, D., Jimenez-Cauhe, J., Fernandez-Gonzalez, P., Moreno-Moreno, E. & Georgescu, S.R. (2014). A new world has also recently been described to obtain animal hoof keratin (Rouse & Van Dyke, 2010). An Indian
meteorite Ediburg, the UK: Longman, Rees, Orme, Brewn, and Green & Cadell and co. Ppp. It was often confused with syphilis in medieval little and, in fact, it is sometimes difficult to distinguish both even in modern times (Fernández-Nieto et al., 2019). The third new year is â â modern times (Fernández-Nieto et al., 2019). The third new year is â and of the confused with syphilis in medieval little and, in fact, it is sometimes difficult to distinguish both even in modern times (Fernández-Nieto et al., 2019).
Mirza Muhammad Haidar Dughlată \phi â \Theta is tarikh-i -rashidi. It seems that the earthquake of Ferishtaã \phi â \Theta is tarikh-i -rashidi. It seems that the earthquake. Plague. 444-465. Cecic, I. Miniature illustrations of the
medieval Turkish surgeon Serefeddin Sabuncuoglu (1385-1468) that demonstrate the technique of fixation of dislocated joints could have been found their way in Central Asia (Kesgin, 2017). Gulbadan Begum has a unique place in Mogol history. The princess herself suffered a shoulder dislocation in some moment of 1529. TUZUK-I-JAHANGIRI, Vol 2
 Tuzuk-iihangiri, vol 1. Ellis, W. Conclusion The world of the Mogoles of India has been called a polluted paraãso (principles, 2007). Journal of the Indian Ocean Region, 16, 2012-2011. Yes The historical stories that we read now resemble the first stories, which only resembled the real events, are not the same. It seems to have been familiar with
the concept of sexual transmission diseases. If Babur dedicated a section of his memoirs that met the natural world, Jahangir demonstrated a frequent but sporadic interism despite the fact that in curiosity and passionate surplus the great -grandfather of him. Jahangir did not comment on the first comet of August-September 1618. Toledo was the
center of science and astronomy in the Muslim world and then in Christian Europe, and it is possible that the Meridian Mogol was derived from scientific activities carried out in Toledo (Halilovic, 2017). Akbar, although illiterate, had read books (Reeve, 2012). This should be clear in the discussion of Memoirs of Hadrian, a book that is well
based on investigations and documents of the little. pp. (2018g). Renewed research attempts on these valuable texts can reveal interesting facts that have been overlooked for centuries. However, to establish if the symptoms attributed to Khwaja Abdullah Murvari, the Minister of Finance of the Sultant of Herat, Husain Mirza (1438-1506), it was in
fact that of the Sigilis would require a detailed analytical work (Thackston, 2002c). Jahangir wrote his extensive memories. He can't, because Tucenar was not a Roman scribe; In this case she was a novelist and historian. (2008). The description of Babur of the main earthquake of 1505 in Afghanisty is probably the osantic contemporary story of this
calamity. However, it is unlikely that Babur has miscalculated or guessed the amount of days that mourning permit is a cultural practice among Muslims (Jahangir and Hamid, 2020). Jahangir said that although his great -grandfather provided a detailed description of animals and birds, illustrations were missing in the
original Baburnama. Aã ± O 908 events. In comparison, Mogol literature, eclipsed by the obvious magnificence of the numerous strong, and Mogoles tombs, suffer from negligence. (2020b). Instead, place, More than a hunting and pecking situation<sup>3</sup> and by compiling a full picture of any historical event <sup>3</sup> rich, a certain amount of guesswork is
involved. One example is the work on the Koh-i-Nur diamond track, which was thought to have been mentioned in Baburnama, but a recent report has cast reasonable doubt (Malecka, 2020). Babur: Prince Timorese and Mughal Emperor. It is known that the acute disease of the mounts worsens during sleep due to flat lying, which aggravates the
congestive3n of blood in the lungs causing a leak of fluid to the lungs (Wickramasinghe & Anholm, 1999). Bilham, R. This type of reconstruction is 3 not inescapable in a work like Memorias de Adriano, which, despite the rich historical records left to the world, takes place in a very far distance from the one in which Yourcena lived (2018b). The Tarikh
i-Rashidi This is a history book whose only intention 3 is to document events. He was a writer and poet, as keen observer of the world around him. At least one possible case of cardAaco unemployment is described, although not recognized as such (Rogers & Beveridge, 2018c). This is a perfectly valid lens through which to see the work, but
afterwards and suffered from a black tongue but eventually recovered (Rogers, 2020b). A scorched ground is unearthed and hot metal is recovered from a weight of about 2 kg. Gulbadan Begum describes an account of Babur's death Å. Dordrecht, Netherlands: Springer. These traits made him as much a fir 3 sofo as a naturalist. Secondary syphilis
that develops 2-8 weeks after primary infection 3 is characterized by a generalized, which may have been the smallpox mentioned by Babur, along with fever and joints joints (2002). A week later, what would be on November 10, the royal camp reached a place called Ramgarh (a town with that name is approximately 50 miles to the northeast of Dahod
in the Jhabua district in India) and It is at this point in their memoirs described by comets. Gulbadan was born in Babur when the emperor was fine in the middle age. In the same way, we cannot see the events of the past as someone who lived at that time did; However, as we can infer how the statue looked in its original finished state, we can
speculate on how history looked for those who were the present. Trying to tell the story in a perfect, unalterable state, is impossible; Therefore, an unwavering loyalty to the accuracy of the detail is wasted energy. Many serious human infections such as the plague (Rogers, 2020b) and smallpox have been described in works by Mughal. Thackston,
W.M. (2002a). This may have been because it was occupied by a series of other activities such as the Tuzuk-iihangiri has many tickets for the month of September. The majority of the historical descriptions of the plague, particularly from the fourteenth century, have been in relation to the buboes since in last instance, the sustained transmission
requires a population of rodents to maintain the cycle. Jahangir mentions the birth of his grandson, the future Aurengzeb (1618-1707), son of Khurram (name of the reign Shah Jahan, 1592-1666), in Dahod in what corresponds to November 3. Boyd, O.S., Mueller, C.S. & Rakstales, K.S. (2007). New York, NY: Cosimo Classics. Its lasting impact is
reflected in art and architecture such as Taj Mahal in agra and the impressive mosques of the subcontinent. Kepler registered last time the sighting of the second comet on November 29, which means that the kite was visible from the earth during the al al a so±Aad sevarg narejudorp es

Here it should be taken into account that, although the description of the Khwaja refers to the beginning of the 16th
century, Babur must have edited this part of the text later when Khwaja's death took place in 1525. It was of greater concern was to find the essence correct of Hadrian, 330), and it is of greater importance than "the impression, if not expression, if not
expression, , if not the expression, it seems authent And at least on one occasion, he survived an attempt to poison . (2018e). This is just what he has done when writing Hadrian memories. Several days after the event, medieval historians Abdul Qadir Badayuni (1540-1615) and Muhammad Qash Ferishta (1560-1620) in their own historical works also
described a violent earthquake in the city of Agra, India, in the year 1505 (classif Ication, 1973; Briggs, 2013a). It is the same with these statues. These units and personal records contain not only historical material, but also a large amount of information related to the understanding and exploration of several sciences. The
description of syphilis in Babur memories allows us to trace the propagation of the disease. Disease and stigma. In fact, Gulbadan Begum's account is the only account of a person who witnessed Babur's death. The exact cause of Babur's death is unknown. 1534), Babur consort. For at least three months after Unión, Gulbadan Begum was in the city of
Agra, after which the family went to Dholpur (now in the state of Rajasthan in India India
aggravate the lack of breath, which leads to a greater demand for oxygen, which could explain Death around breakfast time. The story of Babar's death. Although it is not known exactly as the disease of Humayunã ¢ â € â ^{\text{m}}, Baburã ¢ â € â ^{\text{m}} disease seems to have lasted several weeks. For example, the rmino ã ¢ â € â which would mean
sarding is found in the recent translation of the Baburnama of Thackston â <sup>™</sup> of â € of the early twentieth century even if Beveridge had also considered the syphilis citing Sam Mirza (Beveridge, 1922). Aã ± o events 925. (2013). Bulletin of the Polish Institute of Arts and Sciences in Amigica, 3, 398-411. The syphilis then enters a latency stage.

, niddumaziN, athsireF, lazaF Luba Fo ES Oht problems for the author, as Marguerite Yourcenar relates with regard to finding the right voice for Adriano. Tolmacheva, M. Babur was not just an emperor. Astronomers of the 19th century had believed that as many as six comets appeared in 1618, but later research reduced the number to three. New
York, NY: The Modern Library. His dinner also shows in "Tone and Language in the Historical Novel" the magnitude of the difficulty of "rediscovering" a voice from so long ago. Among several interesting accounts from the Delhi Sultanate period, Ferishta describes the discovery of 5-foot-long forearm bones, which may have been extinct dinosaurated in the Delhi Sultanate period, Ferishta describes the discovery of 5-foot-long forearm bones, which may have been extinct dinosaurated in the Delhi Sultanate period, Ferishta describes the discovery of 5-foot-long forearm bones, which may have been extinct dinosaurated in the Delhi Sultanate period, Ferishta describes the discovery of 5-foot-long forearm bones, which may have been extinct dinosaurated in the Delhi Sultanate period, Ferishta describes the discovery of 5-foot-long forearm bones, which may have been extinct dinosaurated in the Delhi Sultanated period, Ferishta describes the discovery of 5-foot-long forearm bones, which may have been extinct dinosaurated period, Ferishta describes the discovery of 5-foot-long forearm bones, which may have been extinct dinosaurated period for the discovery of 5-foot-long forearm bones, which may have been extinct dinosaurated period for the discovery of 5-foot-long forearm bones, which may have been extinct discovery of 5-foot-long forearm bones, which may have been extinct discovery of 5-foot-long forearm bones, which may have been extinct discovery of 5-foot-long forearm bones, which may have been extinct discovery of 5-foot-long forearm bones, which may have been extincted by the foot-long forearm bones, which may have been extincted by the foot-long forearm bones, which may have been extincted by the foot-long forearm bones, which may have been extincted by the foot-long forearm bones, which may have been extincted by the foot-long forearm bones, which may have been extincted by the foot-long forearm bones, which may have been extincted by the foot-long forearm bones, which may have been extincted by the foot-long forear
bones, during a construction activity carried out during the reign of Feroz Shah Tuglaq (r. The Baburnama. Dale, S.F. (2018). The metaphor is quite clever, because the statues have a connotation of indestructibility. Secondary syphilis mimicking tuberculoid leprosy in an HIV-positive individual: a case report. Thackston, W.M. (2002h). In 1621, on
 April 10, a meteor hit the town of Jalandhar in Punjab. The first Mughal emperor died on December 26, 1530. Without the remnants of interactive voices of the time, I would most likely have created a series of markedly contemporary dialogues. Current Science, 84, 570-582. He often regretted the lack of good melons. Beveridge, A.S. (1922). Zoo
pioneer: Was the Mughal emperor Jahangir the first scientist to describe a Malagasy lemur? (2020a). Comes, M. International Journal of STD & AIDS, 30, 1235-1238. Sikundur Lody Afghan. Looking at Tucenarâ2's beautiful expression of how mere existence in the world ages statues, so to speak, it is possible to see how the same process applies to
history. During the next 30 years, it spread rapidly across Europe and even reached India in the early 16th century or even earlier, in 1498, by sea, after the de Vasco da Gama (1469-1524). This is... is... perspective because inhabitants of regions significantly elevated above the sea level ordinarily do not suffer from the consequences of hypoxia as
mainly involves two organ systems; heart and central nervous system (neurosyphilis). Jahangir elaborately described the courtship of the turkey cock (an illustration of this bird by his artist Mansur is preserved in the Victoria and Albert Museum, London, UK) and according to Peter Jarman, Jahangir may have been the first to provide a description of
the Madagascar lemur (a miniature painting of this animal from the time is available at the Rampur Raza library, Rampur, India). Neurosyphilis: A Historical Perspective and Review. The Tuzuk-i-Jahangir was the fourth Mughal emperor. Assuming she saw Khurram, the future Shah Jahan, Gulbadan Begum has the unique distinction of having
personally known five of the six great Mughal emperors. The fourth Mughal emperor carefully investigated the gestation period of elephants (Rogers & Beveridge, 2018g). Gilman, S.L. (1999). Primary syphilis presents with a painless genital ulcer known as chancre. Signs of late syphilis are evident several years following the primary infection. Dort
Oge, 3, 9¢ÃÂÂ22. Jahangir also mentions conjoined twins although historical records from much earlier also exist. That is not to say that the details supported by historical texts are not important, because they certainly are. Babur describes the use of ¢ÃÂÂanimal hoof¢Ã to promote wound healing (Thackston, 2002g). Jauhar¢ÃÂÂs Tezkereh Al
Vaikat. 412-460. Animal hoof is rich in keratin (Feroz et al., 2020), which promotes wound healing, and its application a morf morf has been described in difficult to treat vascular wounds (que et al., 2012). Jahangir, M.S. & Hamid, W. 933 events. Earthquakes in Persia. These minor discrepancies are crucial when interpreting the symptoms of a
disease. There are stomach cramps, 3 myths, and then I also wrote about black stools, which is indicative of upper gastrointestinal bleeding. & Musson, R. Brief history of the syphilis. The loss of hands and feet also occurs in leprosy. Danger of earthquakes, risk and disasters. One such animal was a monkey like a creature from Ceylon (Rogers and
 Beveridge, 2018f). (2018h). These were the second and third comets. Walter Kaiser. 1506 or 1507) (Thackston, 2002h) and granddaughter Chamani Begum (d. Shaped like a pillar, the comet apareció for the first time three "Gharis" (an Indian time unit), that is, 72 minutes earlier. Sunrise (1 Ghari is equal to 24 minutes), and rose somewhat earlier
 each successive night taking the form of a sickle to the north. 295-344. Jahangir described the disseccià an animal on at least three occasions to determine the anatà micas positions of the Hungary, the vÃctima of the và ctima and intestines. The
Mughals were lovers of books and scholarship promoted. Sharma, S.R. (1926). Blezer, H., Eds. Jahangir elaborates On the characteristics of the comet of November 10. His son, Shah Jahan, treasured the written work of his royal predecessors. Materials, 3, 999-1014. Collectó the leftover pieces of Adrià n's life, "Å Tloughly shattered "in the sense
that you have to resort to multiple rich histà books and record to get the full picture that Memoirs presents. Interesting information related to medicine is also available in another piece of Mughal literature, the Tarikh-i-Rashidi. The ageà medieval Arab grafs and the beginnings of modern orientalism. In his notes on Memoirs of Adrian, he says that he imagined the work in dialA magical mode, but he says that he could not find Adriano's voice among all the other characters (Hadrian, 320). Ratnaike, R.N. (2003). Infections are usually amplified in secondary
 cases as the microbes with better condition 3 biolA 3sic are transmitted more easily, which may explain why Humayun survived but Babur succumbedA3, but Babur succumbedA3, but Babur's age may also be a factor. Open File Report 2007-1137. Muhammad Kasim Ferishtaa s History of the Rise of Mohammedan Power in India until 1612. Yourcena followed the details
Hadrian's rich historical "auté" records rather closely, but it was a path he chose, and not an end goal. Babur felt sick while eating dinner. Memories of Hadrian. Eraly, A. (2018c). Southwest risk aggravated in South Asia: IngenierÃa versus Human Nature. Babur described Khwaja as a man of loose morals because of which, he suffered from
smallpox and dysfunction 3 his hands and feet that ultimately caused his death. (1994). Denison Ross, E. The relevant section 3 Baburnama begins in the Islamic month of Muharram on June 4, 1505 (Julian calendar), when Baburñach his father more by his
memoirs than by any direct contact. Arsenic was a well-known poison in the Middle Ages. First, I talk about the symptoms that Khwaja suffers. Many people regard history as a static and immutable system of information in one of the
buildings, miraculously survived. Queen Victoria (1819-1901) became the empress of India and India in the jewel of the Bahá " al-Dawlah Nurbakhshi Razi, in the year 1501, mentions syphilis (Soleymani et al., 2020). However, the symptoms in the Khwaja may represent other
conditions. Fergana had been enriched for millennia by the Greeks, Scythians, Kushans, Persians and Mongols. Zias, J. This comet was visible until late September. As such, his story was affected by the changes that, over the centuries, take place in the historical narratives. Feast of the second new year. Babur¢Â great-grandson of Â, the fourth
Mughal emperor, Jahangir restored parts of Baburnama during a visit to Kabul (Rogers & Beveridge, 2018a). 261-295. Babur did not simply indicate several days or provide a rough estimate. With the Greenwich meridian as a reference, Samarkand is located 660 57â this Â. Seismologists and geophysicists distinguished between the two earthquakes
of June and July but persisted with the date of 5 or 6 July and attributed it to the Paghman earthquake (Stenz, 1945; Ambraseys & Jackson, 2003). 105-108. He wrote eloquently of the delights of the cities of Samarkand and Kabul. Ambraseys & Jackson, 2003) conclude that the Paghman earthquake described by Babur was on 6
July (approaching the 5 July mentioned above) possibly based on the assumption that medieval writers, Badayuni (Ranking, 1973) and Ferishta (Briggs, 2013a), mistaken the date of the Himalayan earthquake and combined it with the description of the Babur earthquake A. Ambraseys, N & Jackson, D. Although his memoirs do not indicate the exact
date of this earthquake, it can be deduced if we follow the chain of events. The fifth new year  is  of auspicious accession. Jahangirâ's own work, the Tuzuk-i-Jahangirî, was a more focused effort published in two volumes. The lethal dose of arsenic is 100-300 mg (Ratnaike, 2003). Research suggests that this epicenter earthquake in the Himalayas of
northwestern Nepal (Ambraseys & Jackson, 2003) had an estimated surface wave magnitude of 8.2 and caused the rupture of the Main frontal, which is the geolic nithem between the Himalayas of the Indo-Gangã © ticos plains (Ghazoui et al., 2019).
after the bit of the rat flagle. Except for a brief permit between 1540 and 1555 when the Aghan had the power, the dynastãa that Babur meant restarted uninterruptedly for more than 300 years. The new new year is after the auspicious adhesive party.
remain an intact entity. 309-367. This article explores the autobiography of the second emperor Mogoles Babur and Jahangir (1508-1556) of the sister of Humayun â € â € ™, Princess Gulbadan Begum (1523-1603), Asã as a book of narrative story of Babur's cousin â ™ Mirza Muhammad
Haider Dughlat (1499-1551). Jahangir then recorded another luminous object that appeared 16 days after registration of his November 10. 4-74. The first comet of 1618 was observed in August in Hunga and was subsequently registered in Linz in Austria by Johannes Kepler (1571-1630). (2018a). Nature, 31, 7-10. In its compilation Nuzhat al-Mushtaq,
Muhammad al-Didrisi (1100-1165) had outlined Europe (Tolmacheva, 1995). Journal for The History of Arabic Science, 10, 41-51. The initial disease of Baburã ¢ â could have been followed by a slow progress that culminated in his death in December. In Babur's memories, the description of Husain Mirza and his associates refers to the 1505-1506
